

## Service Agency Communities in One World (SKEW) – we support municipal projects for sustainable development worldwide

More and more municipalities are committed to peaceful and sustainable development in line with the specifications of the United Nations 2030 Agenda.

Development policy is a task for society as a whole and municipalities can make a significant contribution to this – as knowledge carriers, trendsetters and networkers.

**Get involved! Around 750 municipalities and their partners in the Global South are already successfully working with us on the following current topics:**

- Globally sustainable municipality
- Migration and development at local level
- Fair trade and fair procurement
- Municipal partnerships and international intermunicipal development relationships

**Help and advice: We help you use your municipal potentials for global sustainability.**

SKEW is your competence and service centre for municipal development policy. Please select from our wide range of topics and interconnected services. We offer you free personal advice as well as practical, financial and personnel support.

We provide you with information, qualified knowledge and networking opportunities through professional exchanges, knowledge transfer and partnerships between municipalities in Germany and the Global South. We support you step-by-step, from the first steps of your commitment to the implementation of complex projects. We host nationally renowned competitions to honour your commitment.

The Bonn-based service agency is part of Engagement Global and has been working on municipal future topics on behalf of the Federal Ministry for Economic Cooperation and Development (BMZ) since 2002. Organisations and bodies supported by the service agency include the federal states, the municipal umbrella organisations as well as relevant civil society organisations. The provision is aimed at local politics and administration and civil society groups that work together with the municipalities.
